

**Visitor management system with service light and alarm contact,  
for simple guiding in temporary facilities such as vaccination centres or Covid19 test stations**

- Status display for room occupancy (free / occupied / not used)
- Integrated service light, e.g. for refilling vaccine, disinfecting room
- Alarm contact for evaluation in remote control centre, e.g. for emergency doctor or security
- Optical feedback on room status directly at the switching unit
- Up to three detectors can be connected (indicator light or alarm module)
- Operation via USB (plug-in power supply/power bank/laptop)
- Very low power consumption
- Cost-effective plug&play wiring with standard components
- Robust housing, easy to set up, can be operated by laymen, fail-safe
- Indicator light easy to attach to temporary structures (e.g. with cable ties, screws, hooks)

### Occupancy display for individual rooms

- Status display for room occupancy (free / occupied / not used)
- Optical feedback for room status directly on the switching unit
- Operation via USB (mains adapter, power bank, laptop)
- Cost-effective plug & play wiring with standard components
- Robust housing, simple installation, amateur operation, fail-safe
- Indicator can be easily attached to temporary structures (e.g. cable ties, screws, hooks)

## Single components for traffic light system for Corona vaccination centre

### ZENTRALE1

- Room free / Room occupied / (Off - not in operation)
- Additional light for service (e.g. refill vaccine, disinfect room)
- Alarm contact for external evaluation, e.g. for emergency doctor or security service
- Supplies up to three indicators (light or alarm contact)
- Operation via USB allows offgrid operation (power bank, USB port on laptop)
- Dimensions approx. 110 x 70 x 45mm

### ZENTRALE2

- Compact single room control with selector switch for Room free / Room occupied / (Off - not in operation)
- Supplies one indicator light
- Operation via USB also allows offgrid operation (power bank, USB port on laptop)
- Dimensions approx. 40 x 40 x 80mm

### LM3

- Indicator light red / green full-surface, Blue service light
- Robust plastic housing with fixing lugs, e.g. for screws, cable ties, hooks
- Protected against dripping water when mounted vertically
- Dimensions approx. 140 x 70 x 45mm

### ALARM4

- Alarm indicator for up to four rooms
- Optical indication of input signal
- Additional acoustic alarm, switchable
- Dimensions approx. 120 x 70 x 45mm

## Accessories visitor management system

### VERB10, VERB20

Connection cable control unit / indicator

- RJ45 network cable
- Available in 10m, 20m

### TÜRSET

Door/window feed-through set

- RJ45 flat cable connection, approx. 30cm
- Supplied with patch cable 1m

### HAKEN

Hook for light module,

- Extra large, e.g. for exhibition walls
- Up to wall thickness/pipe diameter 60mm
- Delivery incl. matching screw/washer/nut

### PB10

USB Powerbank 10.000mAh

- Two USB A outputs
- For up to two control units

## Basic sets - Plug&Play for visitor management system

### BP1: Basic traffic light system package, expandable to up to three indicators

- 1x 4-channel control unit (free/occupied, service, alarm)
- 1x Indicator light
- 1x USB powersupply up to 2A
- 1x USB cable 1.8m
- 1x Network cable 10m

### BP2: Compact system for single room, not extendable

- 1x 1-channel control unit (free/occupied)
- 1x Indicator light
- 1x USB power supply up to 2A
- 1x USB cable 1.8m
- 1x Network cable 10m

## Order form

Please send the completed order form by e-mail to: [info@catcore.eu](mailto:info@catcore.eu)

or by fax to +49 -(0)911- 938 50 272

The submission of an order does not constitute acceptance of the order by Think Solutions GmbH.  
The purchase contract is only concluded through the delivery of a separate confirmation email, or the dispatch of the goods or invoice within seven working days. Please note that we always deliver against payment in advance, deviating payment modalities require the written confirmation by Think Solutions GmbH and must be agreed separately in advance.
